

Predictable and Individual Solutions in Patient Specific Treatment

with Martin Gollner, DMD

Date: Friday, October 4, 2024
Time: 8:00 a.m. registration and breakfast
8:30 a.m. to 3:30 p.m. lecture
Social hour will follow the lecture
Location: Medinah Country Club, 6N001 Medinah Rd.
Fee: Free to CAIDT Members
Non-CAIDT-Member Dentist \$580
Retired Dentist \$500
Student / Specialty Resident / Staff \$150
Continental breakfast and lunch will be served.
Deadline: Register by Friday, September 27

COURSE DETAILS

In all forms of treatment, the patient is the focus, and the dentist must consider every potential outcome of therapy and adapt the treatment according to the individual patient's needs. The more the clinician knows about dental treatment solutions, the more difficult it can be to choose the proper rehabilitation techniques. To that end, the clinician should not lose sight of the therapeutic goal of the treatment plan. For these difficult cases, the dentist could transfer new digital applications and work flows, without forgetting the analog steps for predictable outcome in esthetically and functionally driven reconstructive therapy.

Whether a single tooth restoration in the esthetic area or a full-mouth rehabilitation, all steps must be considered. A promising strategy in dental reconstruction is not just the application of the digital technology in single steps, but also the intelligent linking of analog and digital procedures in a comprehensive treatment workflow.

The lecture will point out the essential analog steps regarding both planning and implementation for superior functional and esthetic outcomes in complex cases, utilizing digital work flows to support optimal patient outcomes. In the end, the positive esthetic outcomes and the functional effectiveness and efficiencies will reflect the treatment success.

OBJECTIVES

Learning objects:

- Find the right position of the upper jaw
- Determine the real inclination of the occlusal plane
- Find the lower jaw's relation to the upper jaw
- Recognize stumbling blocks or difficulties before treatment starts
- Achieve predictable esthetic, long-term solutions in implant-reconstructions
- Provide for tissue management with root-slices
- Disassemble the treatment process in single steps

CONTINUING EDUCATION CREDITS

5 (five) hours of CE credit will be issued.

TO REGISTER

Follow this link to register online: [REGISTER FOR OCTOBER 2024](#)

Or, register by email or postal mail by completing the registration form on the following page. Payment may be made by check or credit card.

Registration deadline is September 27, 2024.

Dr. Martin Gollner

Dr. Martin Gollner is a highly accomplished clinician with expertise in implantology, esthetic dentistry, periodontology, and endodontics. He holds a doctorate in dental medicine and is a recognized specialist in oral surgery. Dr. Gollner has his own practice in Bayreuth, Germany. He is actively involved in dental education, supervises implant training for practitioners, and serves as a director of a study club. He has also established a dental laboratory with a focus on aesthetics and implant superstructures. He lectures nationally and internationally on implantology, esthetics and functional rehabilitations. He has also published several articles in national and international journals. With his extensive experience and commitment to excellence, he is a trusted professional in the field.

The Chicago Academy of Interdisciplinary Dentofacial Therapy IL is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term extends from November 1, 2021, to October 31, 2024. Provider #217373.
